International Symposium on Biorefining, Papermaking, and Lignocellulosic Materials 2026 (ISBPLM 2026)

November 6-9, 2026, Nanning, China

SYMPOSIUM PROGRAM

Guangxi Key Laboratory of Clean Pulp & Papermaking and Pollution Control,

School of Light Industry and Food Engineering, Guangxi University, Nanning, China.

Sponsored and Organized by:

- **Guangxi University (GXU)**
- **South China University of Technology (SCUT)**
- **Tianjin University of Science and Technology (TUST)**
- **Shaanxi University of Science and Technology (SUST)**
- **Nanjing Forestry University (NFU)**
- **Qilu University of Technology (Shandong Academy of Sciences) (QUT)**
- **Dalian Polytechnic University (DPU)**
- **Hubei University of Technology (HBUT)**

Introduction

The International Symposium on Biorefining, Papermaking, and Lignocellulosic Materials 2026 (ISBPLM 2026) will be held at Wosheng Hotel in Nanning, China from November 6 to 9, 2026. The symposium will be sponsored and organized by Guangxi University (GXU), South China University of Technology (SCUT), Tianjin University of Science and Technology (TUST), Shaanxi University of Science and Technology (SUST), Nanjing Forestry University (NFU), Qilu University of Technology (Shandong Academy of Sciences) (QUT), Dalian Polytechnic University (DPU), Hubei University of Technology (HBUT).

The conference will invite domestic and foreign experts and scholars in papermaking, biorefining, fiber-based biomass functional materials, and sustainable packaging materials and other related fields to deliver keynote presentations and engage in technical communications. By facilitating in-depth discussions on the industry's emerging opportunities, challenges, and future trajectories, the event serves as a premier platform for Chinese researchers to gain international insights and foster global collaboration. Featuring a comprehensive program of plenary speeches, invited and thematic session reports, poster presentations, and conference papers, we cordially invite experts, scholars, and entrepreneurs from around the world to gather in Nanning for this prestigious academic event.

Organization and Chairs

Conference Chairs

Shuangfei Wang, Academician, Guangxi University

Bowen Cheng, Academician, Tianjin University of Science and Technology

Co-Chairs

Fuping Lu, Tianjin University of Science and Technology

Qiang Yong, Nanjing Forestry University

Zhaoqing Lu, Shaanxi University of Science and Technology

Runcang Sun, Dalian Polytechnic University

Xingxiang Ji, Qilu University of Technology (Shandong Academy of Sciences)

Xinwen Peng, South China University of Technology

Chengrong Qin, Guangxi University

Academic Committee

Qingda An, Dalian Polytechnic University

Chaoji Chen, Wuhan University

Jiachuan Chen, Qilu University of Technology (Shandong Academy of Sciences)

Gang Chen, South China University of Technology

Honglei Chen, Qilu University of Technology (Shandong Academy of Sciences)

Lihui Chen, Fujian Agriculture and Forestry University

Hongqi Dai, Nanjing Forestry University

Guigan Fang, Institute of Chemical Industry of Forest Products, Chinese Academy of Forestry

Shiyu Fu, South China University of Technology

Dangge Gao, Shaanxi University of Science and Technology

Jiaqi Guo, Nanjing Forestry University

Qingxi Hou, Tianjin University of Science and Technology

Xin Huang, Sichuan University

Caoxing Huang, Nanjing Forestry University

Xingxiang Ji, Qilu University of Technology (Shandong Academy of Sciences)

Liqiang Jin, Qilu University of Technology (Shandong Academy of Sciences)

Yongcan Jin, Nanjing Forestry University

Fangong Kong, Qilu University of Technology (Shandong Academy of Sciences)

Bo Li, South China University of Technology

Xuehui Li, South China University of Technology

Xuliang Lin, Guangdong University of Technology

Long Liu, Jiangnan University

Chuanfu Liu, South China University of Technology

Hongbin Liu, Tianjin University of Science and Technology

Zhong Liu, Tianjin University of Science and Technology

Yu Liu, Qilu University of Technology (Shandong Academy of Sciences)

Zhaoqing Lu, Shaanxi University of Science and Technology

Bin Lv, Shaanxi University of Science and Technology

Shuangxi Nie, Guangxi University

Feng Peng, Beijing Forestry University

Xinwen Peng, South China University of Technology

Chengrong Qin, Guangxi University

Junli Ren, South China University of Technology

Li Shuai, Fujian Agriculture and Forestry University

Chuanling Si, Tianjin University of Science and Technology

Runcang Sun, Dalian Polytechnic University

Haiqiang Shi, Dalian Polytechnic University

Yan Shi, Tianjin University of Commerce

Yanjun Tang, Zhejiang Sci-Tech University

Dazhi Wang, Dalian Polytechnic University

Haisong Wang, Dalian Polytechnic University

Lijun Wang, Zhejiang University of Science and Technology

Xiaohui Wang, South China University of Technology

Xiaoying Wang, South China University of Technology

Xuechuan Wang, Shaanxi University of Science and Technology

Zhiguo Wang, Nanjing Forestry University

Weibing Wu, Nanjing Forestry University

Wei Wu, Wuhan University

Lingping Xiao, Dalian Polytechnic University

Feng Xu, Beijing Forestry University

Yongjian Xu, Shaanxi University of Science and Technology

Guihua Yang, Qilu University of Technology (Shandong Academy of Sciences)

Haitao Yang, Hubei University of Technology

Haipeng Yu, Northeast Forestry University

Tongqi Yuan, Beijing Forestry University

Sufeng Zhang, Shaanxi University of Science and Technology

Xing Zhou, Xi'an University of Technology

Xin'an Zeng, Foshan University

Hongxiang Zhu, Guangxi University

Akira Isogai, The University of Tokyo, Japan

Chunlin Xu, Åbo Akademi University, Finland

Hongli Zhu, Northwestern University, US

Huining Xiao, University of New Brunswick, Canada

Junyong Zhu, USDA Forest Products Lab, US

Lucia Lucian Amerigo, North Carolina State University, US

Markus Biesalski, Technical University of Darmstadt, Germany

Orlando Rojas, The University of British Columbia, Canada

Pedram Fatehi, Lakehead University, Canada

Shijie Liu, State University of New York, US

Xuejun Zou, FPInnovations, Canada

Yonghao Ni, The University of Maine, US

Organizing Committee

Shuangxi Nie, Guangxi University

Chen Liang, Guangxi University

Bin Lv, Shaanxi University of Science and Technology

Hongbin Liu, Tianjin University of Science and Technology

Fangong Kong, Qilu University of Technology (Shandong Academy of Sciences)

Zhiguo Wang, Nanjing Forestry University

Zhiqiang Fang, South China University of Technology

Conference Schedule

Date	Time	Session	Location
November 6th (Friday)	**08:00-21:00**	Registration	Hotel Lobby (1F)
	14:00-18:00	Graduate Student Session	VIP1 厅 VIP1 Hall (4F) VIP2 厅 VIP2 Hall (4F)
	18:00-20:00	Buffet Dinner	宁粤厅 Ningyue Hall (2F)
November 7th (Saturday)	**08:30-12:00**	Opening Ceremony & Plenary Speeches	沃笙厅 Wosheng Hall (4F)
	12:00-14:00	Buffet Lunch	宁粤厅 Ningyue Hall (2F)
	14:00-18:00	Topic 1. Green and Low-Carbon Papermaking	沃丽厅 Woli Hall (4F)
		Topic 2. Advanced Biomass Materials	沃轩厅 Woxuan Hall (4F)
		Topic 3. Cellulose-Based Functional Materials and Devices	沃雅厅 Woya Hall (4F)
		Topic 4. Biomass Refining and Chemicals	VIP1 厅 VIP1 Hall (4F)
		Topic 5. Biological Material Catalytic Transformation	VIP2 厅 VIP2 Hall (4F)
		Topic 6. Sustainable Packaging Materials	金玉满堂厅 Jinyumantang Hall (2F)
	13:30-18:00	Topic 7. Special Session for Young Scholars	沃美厅 Womei Hall (4F)
	18:00-20:00	Dinner	沃笙厅 Wosheng Hall (4F)

Date	Time	Session	Location
November 8th (Sunday)	**08:30-12:00**	Topic 1. Green and Low-Carbon Papermaking	沃丽厅 Woli Hall (4F)
		Topic 2. Advanced Biomass Materials	沃轩厅 Woxuan Hall (4F)
		Topic 3. Cellulose-Based Functional Materials and Devices	沃雅厅 Woya Hall (4F)
		Topic 4. Biomass Refining and Chemicals	VIP1 厅 VIP1 Hall (4F)
		Topic 5. Biological Material Catalytic Transformation	VIP2 厅 VIP2 Hall (4F)
		Topic 6. Sustainable Packaging Materials	金玉满堂厅 Jinyumantang Hall (2F)
		Topic 7. Special Session for Young Scholars	沃美厅 Womei Hall (4F)
	12:00-14:00	Buffet Lunch	宁粤厅 Ningyue Hall (2F)
	14:00-18:00	Closing Ceremony & Plenary Speeches	沃笙厅 Wosheng Hall (4F)
	18:00-20:00	Buffet Dinner	宁粤厅 Ningyue Hall (2F)
November 9th (Monday)	**08:30-18:00**	Departure	

Conference Distinguished Guests

特邀院士

报告题目

《竹纤维基多孔材料的绿色构筑与高性能化》

石　碧
四川大学

中国工程院院士，四川大学教授，全国政协常委，Biomass Utilization、Collagen and Leather 期刊主编，制革清洁技术国家工程实验室主任。主要从事生物质加工利用、制革化学、皮革清洁生产、皮胶原高值转化利用研究。以第一或通讯作者发表论文 520 余篇（其中 SCI 收录 230 余篇），出版专著和教材 7 部。获国家授权发明专利 70 余项，已落地转化 15 项。研究成果获国家技术发明二等奖 2 项、国家科技进步二等奖 1 项、部省级一、二等奖 5 项。被评选为全国先进工作者，获国际皮革工艺师和化学家协会联合会杰出贡献奖（IULTCS Merit Award）、何梁何利基金科学与技术创新奖、全国商业最高科学技术奖。

特邀院士

报告题目

《新质生产力提升林浆纸产业低碳发展》

王双飞
广西大学

中国工程院院士，广西大学教授、博士生导师，广西大学轻工技术与工程学科带头人、广西清洁化制浆造纸与污染控制重点实验室主任，广西大学现代造纸产业技术研究院院长。兼任《Biomass Utilization》期刊主编、中国造纸杂志社编委会副主任。长期致力于造纸清洁生产与末端治理的应用基础研究、关键技术开发及产业化应用，构建了高温二氧化氯漂白与高纯度二氧化氯制备技术与装备体系，攻克我国纸浆清洁漂白“卡脖子”难题；建立制浆造纸废水近零排放工程理论与关键技术体系，突破高浓废水高效厌氧处理与中水回用瓶颈，为保障我国造纸行业绿色高质量发展作出重要贡献。先后以第一完成人获国家技术发明奖二等奖、国家科学技术进步奖二等奖，何梁何利基金科学与技术创新奖以及省部级科技奖励多项；获得全国先进工作者、全国杰出专业技术人才、全国模范教师、全国五一劳动奖章等荣誉。

特邀院士

报告题目

《生物质材料功能化及在包装和农业领域的应用》

肖惠宁
加拿大新布伦瑞克大学

加拿大工程院院士（FCAE），新布伦瑞克大学（UNB）荣誉教授，南京林业大学木质纤维素功能材料中心首席科学家，SCI 期刊 J. Bioresour. Bioprod. 主编。1995 年于加拿大 McMaster 大学化学工程专业获博士学位，1996-2001 年在英国 Manchester 大学任讲师和博士生导师，2001 年赴 UNB 任教。主要研究方向为功能高分子改性天然纤维素，多重高阻隔环境友好包装材料，智能性水凝胶，绿色吸附剂 / 药物载体和纳米材料在功能材料，环境 , 农业等领域的应用。迄今为止已发表 SCI 论文 600 余篇 (谷歌学术引用次数 >34200，h 指数 88)。荣获科睿唯安（Clarivate）2024 和 2025 年度“全球高被引科学家”交叉学科高被引奖。自 1996 年任教以来，共培养了 80 余位博士生和博士后，其中多人获重要荣誉和奖项，包括入选 FCAE, 加拿大首席研究主席和中国国家基金委 " 杰青 " 项目。

特邀教授

报告题目

《蛋白质生物精深加工技术与应用》

赵谋明
华南理工大学

长江学者特聘教授，华南理工大学博士生导师，国务院政府特殊津贴专家，华南理工大学国家重点学科食品科学学科带头人，广东省食品绿色加工与营养调控工程技术研究中心主任，中国生产力促进中心协会特医食品及生物活性肽工委会专家委员会主任委员，中国食品科学技术学会食品添加剂分会副理事长，中国食品科学技术学会传统酿造食品分会副理事长。长期从事蛋白质生物催化转化及发酵食品代谢调控基础理论与关键技术研究，开发了改善睡眠、降尿酸、抗疲劳、改善记忆以及改善关节等功效显著和功能因子明确的系列高品质功能性肽产品，相关成果在国内 40 多家大中型企业成功转化，产生了显著的经济效益。获得国家科技进步二等奖 3 项，省部级一等奖 8 项，获国家授权发明专利 200 余件，获中国专利优秀奖、广东省专利金奖各 1 项，主编和参编著作、教材 6 本，以第一作者或通讯作者发表 SCI 收录论文 320 余篇，H 指数为 103，进入国际农业科学家 ESI 排名前 1%，连续 11 年入选“中国高被引学者”。

特邀教授

报告题目

《酶制剂与半纤维素的高值转化》

江正强
中国农业大学

中国农业大学食品科学与营养工程学院教授，博士生导师。中国轻工食品生物工程重点实验室主任和中原食品实验室常务副主任，国家重点研发计划首席科学家。长江学者特聘教授，国家杰出青年科学基金获得者，国家万人计划领军人才。入选国家百千万工程有突出贡献中青年专家等。兼任中国农业工程学会农产品加工分会主任委员、中国食品科学技术学会酶制剂分会副主任委员、中国生物发酵产业协会益生元分会主任委员等，以及《Food Bioengineering》副主编、《Food Chemistry》和《食品科学》等 10 多种期刊编委。主要研究方向酶与发酵工程、食品合成生物学等，主持国家重点研发计划、国家自然科学基金重点项目等 30 余项。发表论文 500 多篇，其中 SCI 论文 250 余篇，专著 6 部，授权发明专利 80 多项。获国家科技进步二等奖 2 项、国家科技发明二等奖 1 项、光华工程科技奖 2 项等。

特邀教授

报告题目

《纸基智能传感器及其在食品质量与安全中的应用》

邹小波
江苏大学

江苏大学校长、教授、博士生导师，入选长江学者特聘教授，国家万人计划科技领军人才、百千万人才工程和神农领军英才等，全国创新争先奖状获得者。从事食品、农产品无损检测研究 30 余年，率领研究团队在“十三五”、“十四五”国家重点研发计划、863 计划、十二五支撑、国家自然基金等十多项国家、部省级项目的资助下，在食品、农产品无损检测的理论创新、技术突破和装备开发方面取得了突破性进展。发表 SCI 论文 300 余篇，已授权国际发明专利 16 件，中国发明专利 87 件，获中国专利优秀奖 1 项，带领团队入选全国高校黄大年式教师团队，成果先后获得国家技术发明二等奖 2 项、省部级一等奖 5 项等。

特邀教授

报告题目

《香味协同与释放控制关键技术及应用》

肖作兵
上海交通大学

上海交通大学特聘教授、博士生导师、国家重点研发计划首席科学家、新世纪百千万人才国家级人选、享受政府特殊津贴专家、中国香料香精科技委副主任。30 年专注香味协同与释放调控科学技术研究，主持国家“十三五”重点研发计划、“十二五”科技支撑计划、国家 973 计划、国家自然基金重点项目等 20 多项；以第一或通讯作者发表 SCI 收录论文 253 篇，他引 11016 次，出版著作 5 部，2023-2025 连续入选中国轻工与食品领域高被引学者；获授权国家发明专利 66 件。以第一完成人获国家及省部级教学科研成果奖 10 项，入选上海市科技领军人才，荣获“全国优秀教师、上海市劳动模范、上海市五一劳动奖章、中国香料香精化妆品 40 年杰出贡献人物”等荣誉。

特邀教授

报告题目

《生物质能源与材料研发进展》

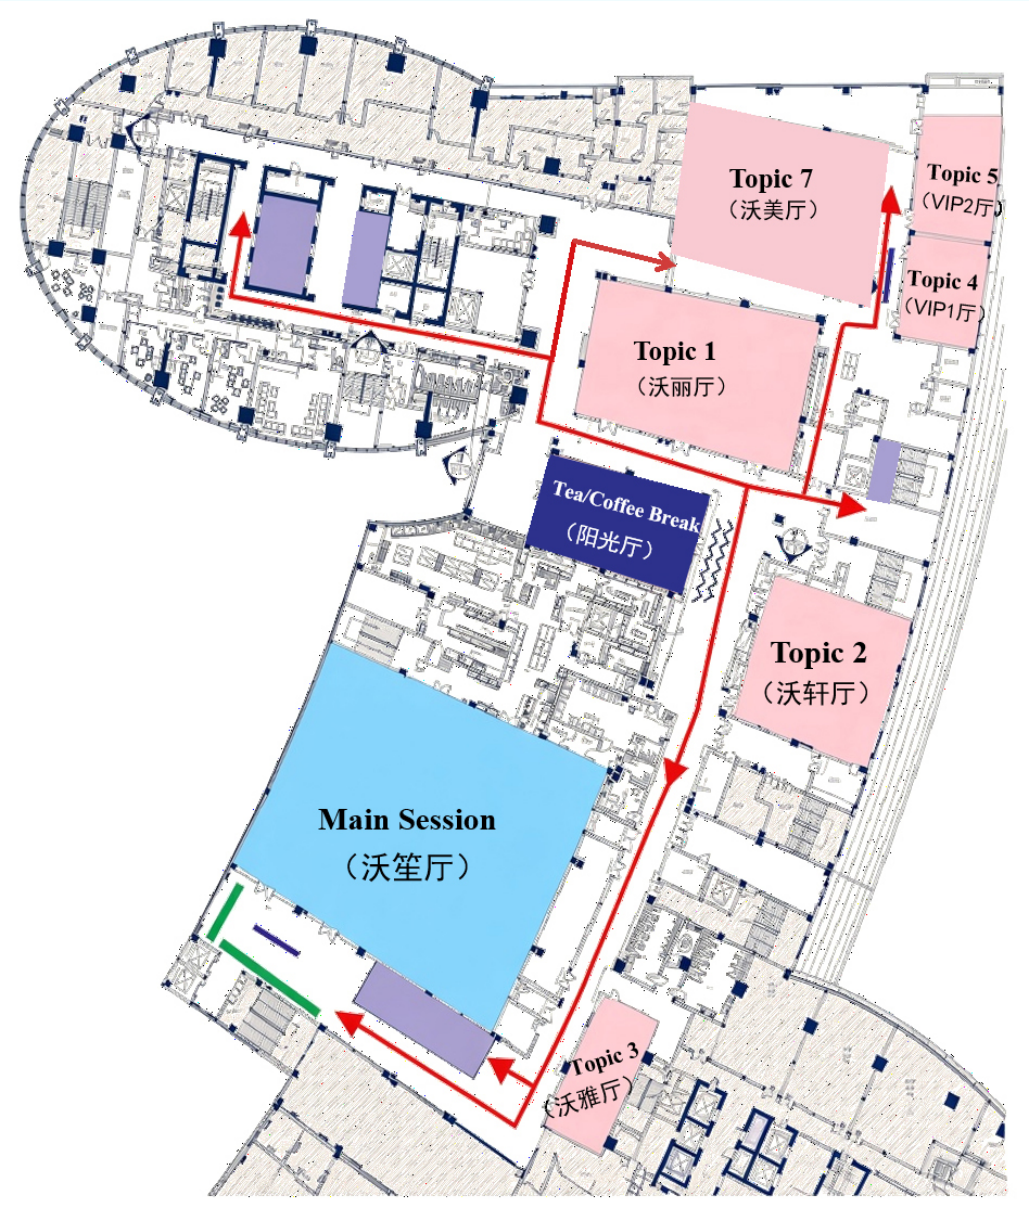

孙润仓
大连工业大学

大连工业大学教授，杰青、长江学者，973 项目首席科学家，辽宁省生物质化学与材料重点实验室主任。曾任华南理工大学制浆造纸工程国家重点实验室主任、北京林业大学材料科学与技术学院院长。长期从事生物质转化新材料与新能源研究，在 Adv. Mater.、Angew Chem. Int. Edit.、Nat. Commun.、Adv. Energy Mater. 等高水平 SCI 期刊发表论文 600 余篇，总被引 8.6 万余次，H 因子 148，连续多年入选科睿唯安、爱思唯尔全球高被引学者及斯坦福全球前 2% 顶尖科学家榜单。主参编英文专著 36 部，授权发明专利 178 件；获国家技术发明二等奖 3 项、省部级一等奖 10 项，光华工程科技奖、美国化学会安塞姆·佩恩奖（国际纤维素与可再生资源材料领域最高奖）等重要奖项。为英国皇家化学会 Fellow，曾任第六、七届国务院学位委员会轻工技术与工程学科评议组成员及第七届教育部科学技术委员会化学化工学部委员，中国生物工程学会第六、七届理事，担任多种国内外期刊主编、副主编及编委；培养大批高层次人才，含国家杰青 2 人、长江学者 5 人、国家万人计划领军人才 5 人等国家级人才。

International Symposium on Biorefining, Papermaking, and Lignocellulosic Materials (ISBPLM) Nanning, China

(November 6-9, 2026)

Main Session (Wosheng Hall)

November 7, 2026, Saturday Morning Sessions

08:30-08:50	Opening Ceremony
08:50-08:55	Conference Group Photo
Plenary Speeches, Session 1 | 主持人：肖惠宁　院士（加拿大新布伦瑞克大学）	
08:55-09:00	Host Opening & Introduction
09:00-09:30	竹纤维基多孔材料的绿色构筑与高性能化 Green Fabrication and High-Performance Design of Bamboo Fiber-Based Porous Materials 石　碧　院士丨四川大学
09:30-10:00	新质生产力提升林浆纸产业低碳发展 New Quality Productive Forces Driving Low-Carbon Development in the Forestry, Pulp and Paper Industry 王双飞　院士丨广西大学
10:00-10:30	Tea/Coffee Break
Plenary Speeches, Session 2 | 主持人：吉兴香【齐鲁工业大学（山东省科学院）】	
10:30-10:35	Host Opening & Introduction
10:35-11:05	生物质材料功能化及在包装和农业领域的应用 Functional-modified biomass materials and applications in packaging and agriculture 肖惠宁　院士丨加拿大新布伦瑞克大学
11:05-11:35	蛋白质生物精深加工技术与应用 Protein Bio-refining Technology and Application 赵谋明丨华南理工大学
11:35-11:40	Host Wrap-up
12:00-14:00	Buffet Lunch

Topic 1. Green and Low-Carbon Papermaking (Woli Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：王志国（南京林业大学）、王强【齐鲁工业大学（山东省科学院）】

14:00-14:05	Host Opening & Introduction
14:05-14:20	Green Separation Technologies and Applications for Biomass Components 许　凤	北京林业大学
14:20-14:30	High-strength straw chemi-mechanical pulp 李建国	福建农林大学
14:30-14:40	Superbase Ionic Liquids-Driven Efficient Cellulose Dissolution and Versatile Regenerated Materials 唐艳军	浙江理工大学
14:40-14:50	Fabrication of multi-functional flexible paper-based material 王　强	齐鲁工业大学（山东省科学院）
14:50-14:58	Evolution of Refining-Zone Mechanics and Pulp Refining Characteristics over the Full Service Life of Refiner Plates under Bar-Height Loss and Leading-Edge Rounding 刘　欢	天津科技大学
14:58-15:06	Evaluation of Four Eucalyptus Wood Resources for Bleached Chemi-Mechanical Pulping 梁芳敏	中国林业科学研究院林产化学工业研究所
15:06-15:16	Biomimetic Nanozyme-Driven Mild Lignin-First Strategy for Clean Production of Non-Wood Pulp 王冠华	天津科技大学
15:16-15:26	Design and Industrial Application of Cellulose-Based Solid Electrolytes for Low-Frequency Economy 高雪洁	大连工业大学
15:26-15:36	Structural Design, Property Tuning, and Advanced Applications of Multidimensional Fiber Materials 沈梦霞	陕西科技大学
15:36-15:44	High-Value Utilization of Wood Fibers through Photocatalytic Conversion and Construction of Functional Materials 肖鑫宇	浙江科技大学
15:44-15:52	Green Fabrication and Multifunctionalization of Lignocellulose-Based Materials 黄灵芝	大连工业大学
15:52-16:07	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人：石海强（大连工业大学）、苗庆显（福建农林大学）	
16:07-16:12	Host Opening & Introduction
16:12-16:27	Direct Utilization of Black Liquor for Adhesive Valorization Toward Sustainable and Zero-Waste Non-Wood Biorefinery 袁同琦 | 北京林业大学
16:27-16:37	Reaction Properties of Viscose-Grade Dissolving Pulp and Their Improvement 苗庆显 | 福建农林大学
16:37-16:47	Microwave puffing pretreatment for enhanced coupling and optimization in green pulping 刘玉新 | 昆明理工大学
16:47-16:55	Efficient Treatment Technologies for Chemi-Mechanical Pulp Wastewater: Resource Recovery and Water Reuse Strategies 田庆文 | 中国林业科学研究院林产化学工业研究所
16:55-17:03	Study on Sodium Carbonate Oxygen-Alkali Pulping Process of Non-Wood Fiber Raw Material 甘　鹏 | 齐鲁工业大学（山东省科学院）
17:03-17:13	Resource Utilization of Hydrolyzed By-products from Pre-hydrolysis and Kraft Pulp Process 石海强 | 大连工业大学
17:13-17:23	Research on Steam Condensation Heat Transfer Characteristics and Two-Phase Flow Pattern Evolution in Multi-Channel Cylinder Dryer 乔丽洁 | 陕西科技大学
17:23-17:33	From Naturally Architected Microparticles to Reconfigurable Building Blocks for Paper-Based Material 赵　泽 | 武汉大学
17:33-17:41	Construction of Lignin-Based Electrodes and Their Applications in Energy Storage 佟　瑶 | 大连工业大学
17:41-17:49	Organic Acid-Mediated Selective Fractionation and Structural Regulation of Lignocellulose for High-Value Utilization 罗雅丹 | 广西大学
18:00-20:00	Dinner

Topic 1. Green and Low-Carbon Papermaking (Woli Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人：杨海涛（湖北工业大学）、任俊莉（华南理工大学）

08:30-08:35	Host Opening & Introduction
08:35-08:50	Key Technologies for the Development and Quality Improvement of High-Purity Specialty Fiber Pulp through Green Refining of Biomass 任俊莉 | 华南理工大学
08:50-09:00	Research on Sodium Carbonate-Oxygen Alkali Pulp Production from Non-Wood Fiber Raw Materials 张　凯 | 齐鲁工业大学（山东省科学院）
09:00-09:10	Rapid Evaluation of Raw Materials and Intelligent Process Control Technology for Chemical Mechanical Pulp 吴　斑 | 中国林业科学研究院林产化学工业研究所
09:10-09:18	Fibrillated fibers derived from the papermaking refining process for thermal insulation, adsorption, and electrical conduction applications 傅成龙 | 大连工业大学
09:18-09:28	Click chemistry for studying the lignification process in plant cell walls 杨海涛 | 湖北工业大学
09:28-09:38	Multi-scale cellulose-based materials for the capture of micro/nanoplastics 卞辉洋 | 南京林业大学
09:38-09:48	Cellulose Functional Materials for Energy and Light/Thermal Management 陈　胜 | 北京林业大学
09:48-09:56	Green fractionation approaches of lignocellulosic biomass for isolating high-valued biopolymers 张永超 | 齐鲁工业大学（山东省科学院）
09:56-10:04	Black Liquor Lignin-Derived Hard Carbon Anodes: Controllable Fabrication and Sodium Storage Mechanism 任文锋 | 大连工业大学
10:04-10:19	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人：杨硕（天津科技大学）、宋顺喜（陕西科技大学）	
10:19-10:24	Host Opening & Introduction
10:24-10:39	Energy Consumption Accounting and Carbon Emission Reduction in Chemical Pulp Production Process 徐　峻 | 华南理工大学
10:39-10:49	Preparation of Nanocellulose-Based Functional Materials and Their Applications in Water Pollution Control 张学金 | 浙江科技大学
10:49-10:59	Mechanochemical self-assembly of flexible PCC/CNF composites with tunable morphologies for sustainable paper engineering 宋顺喜 | 陕西科技大学
10:59-11:09	Interface and Properties of Micro/Nano Waste Paper Fiber-Reinforced Green Composites 张效林 | 西安理工大学
11:09-11:17	Structuring Liquids through the Tailored Progressive Directed Assembly of Lignin Nanoparticles at the Liquid-Liquid Interface 姚明珠 | 昆明理工大学
11:17-11:27	Technological innovations and development trends of high-performance fiber paper-based functional materials 杨　硕 | 天津科技大学
11:27-11:37	Cross-Scale Destabilization of Granule-based Anaerobic Systems for Recycled Pulp Wastewater 张　健 | 广西大学
11:37-11:45	Extraction of ampelopsis japonica polysaccharides using p-toluenesulfonic acid assisted n-butanol three-phase partitioning: physicochemical, rheological characterization and antioxidant activity 吴　彦 | 齐鲁工业大学（山东省科学院）
11:45-11:53	Life-Cycle Environmental Footprint Assessment of Lignocellulosic Biomass Valorization 罗青柳 | 广西大学
12:00-14:00	Buffet Lunch

Topic 2. Advanced Biomass Materials (Woxuan Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：郭保林（西安交通大学）、王亚楠（四川大学）

14:00-14:05	Host Opening & Introduction
14:05-14:20	Xylan and lignin-based functional materials 彭　锋丨北京林业大学
14:20-14:35	Roll-to-Roll Manufacturing of Mycelium Materials for Synthetic Leather Applications 陈　意丨四川大学
14:35-14:45	High-Performance Functional Leather Materials 高党鸽丨陕西科技大学
14:45-14:55	High-performance or multi-functional UV-curing 3D printing materials derived from biomass resources 刘承果丨南京林业大学
14:55-15:05	Molecular Simulation for Biomass Pretreatment and Functional Lignin Material Design 陈理恒丨广东工业大学
15:05-15:15	Lignin-based advanced functional materials 王　欢丨广州大学
15:15-15:25	Acid-catalyzed Thermal Condensation Mechanism of Dehydrogenation Polymer (DHP) and Its Bonding Performance 王　鹏丨湖北工业大学
15:25-15:35	Structural Design of Biomass-Based Materials and Enhancement of Separation and Mass Transfer Functions 杨磊鑫丨天津科技大学
15:35-15:43	From lignin to photoluminescence: Deciphering the carbon dots bridge for tailored photophysics 王瑞彬丨南华大学
15:43-16:00	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人： 彭锋（北京林业大学）、陈意（四川大学）	
16:00-16:05	Host Opening & Introduction
16:05-16:20	Chitosan-Based Hydrogel for Rapid Hemostasis and Accelerated Wound Healing 郭保林丨西安交通大学
16:20-16:30	Multiscale mass transfer and crosslinking: Mechanism of chrome-free tanning for collagen 王亚楠丨四川大学
16:30-16:40	Multifunctional Down Fiber Platforms for Sustainable Uranium Extraction and Real-Time Monitoring 强涛涛丨陕西科技大学
16:40-16:50	Construction and Applications of Animal-Skin-Based Flexible Conductive Sensing Materials 辜海彬丨四川大学
16:50-17:00	Preparation and Application of Lignin-Based Smart Responsive Materials 王海松丨大连工业大学
17:00-17:10	Wettability regulation and oil-water separation application of lignin-based multi-stage micro/nano coatings 倪书振丨齐鲁工业大学（山东省科学院）
17:10-17:20	Reprogramming Plant Polyphenol into Electronically Active Matter for Sustainable Catalysis and Bioelectronics 洪工画丨四川大学
17:20-17:28	Natural Polyphenol-Mediated Multifunctional Separation Materials and nanocarriers of pesticide 王　毓丨成都大学
17:28-17:36	Bioinspired Natural Fibers-Derived Wearable Thermochromic Materials for All-Season Self-adapting Thermal Management 谢　龙丨北华大学
17:36-17:44	Electromagnetic response behavior and energy conversion mechanism of biomass based materials under alternating electric field 王洪瀚丨浙江科技大学
18:00-20:00	Dinner

Topic 2. Advanced Biomass Materials (Woxuan Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人： 黄鑫（四川大学）、周加境（四川大学）

08:30-08:35	Host Opening & Introduction
08:35-08:50	Odor regulation and its functional innovation research 胡　静丨华东理工大学
08:50-09:00	Advanced energy catalytic carbon materials from forest biomass 范孟孟丨南京林业大学
09:00-09:10	Preparation and Application of Protease Inhibitors for Leather Biotechnology 曾运航丨四川大学
09:10-09:20	Construction of closed-loop recyclable polymers through structural modification of oil molecules 贾普友丨中国林业科学研究院林产化学工业研究所
09:20-09:30	Structural Regulation and Performance Study of Lignin-Based Dynamic-Permanent Crosslinking Network 薛白亮丨陕西科技大学
09:30-09:40	Constructing robust and sustainable bamboo-based structural and functional materials through bonding network reconstruction 肖　霄丨四川大学
09:40-09:48	Bioinspired Shape-adaptive Gelatin-based Hydrogel for Efficient Interfacial Radionuclide Decontamination through Synergistic Multimodal Mechanisms 白忠薛丨西南科技大学
09:48-09:56	Hierarchical Collagen Networks for Flexible Biomass-Derived Neutron Moderation and Absorption Materials 王亚平丨四川大学
09:56-10:11	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人： 胡静（华东理工大学）、范孟孟（南京林业大学）	
10:11-10:15	Host Opening & Introduction
10:15-10:30	Design and Application of Collagen-based Chemical Separation Materials 黄　鑫丨四川大学
10:30-10:40	Green Biomanufacturing of Hydrogel-State Microalgae 周加境丨四川大学
10:40-10:50	Structural regulation of lignin-based carbon and its energy storage application 席跃宾丨齐鲁工业大学（山东省科学院）
10:50-11:00	Construction of Protein-Based Fluorescent Probes and Their Application in the Detection of Uranyl Ions in Aqueous Environments 魏燕霞丨西南科技大学
11:00-11:10	Lignin Microstructure Engineering: From Assembly Mechanisms to Optical Materials 王静禹丨四川大学
11:10-11:20	Lignin-enabled functional waterborne polyurethane 邱文莲丨广东工业大学
11:20-11:28	Ultrafast capture of strontium by mesoporous potassium titanium phosphate with collagen fiber templates 骆　微丨四川大学
11:28-11:36	Circular 4D Printing of Multi-functional Polymers 胡　云丨中国林业科学研究院林产化学工业研究所
11:36-11:44	Construction of a full-component lignocellulosic material based on the $ZnCl_2$ dissolution system 王忠国丨聊城大学
12:00-14:00	Buffet Lunch

Topic 3. Cellulose-Based Functional Materials and Devices (Woya Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：陈朝吉（武汉大学）、王蕾（西湖大学）

14:00-14:05	Host Opening & Introduction
14:05-14:20	Paper-based electrode materials 彭新文｜华南理工大学
14:20-14:30	Forming of Textile Structure and Engineering Applications 马丕波｜江南大学
14:30-14:40	Preparation and Functional Applications of Cellulose Nanocrystal-Based Circularly Polarized Optical Devices 李　伟｜东北林业大学
14:40-14:50	Lignin-Degrading-Inspired Dehydrogenative Photocatalysis 袁占辉｜福建农林大学
14:50-15:00	Nanocellulose-Based Electronic Functional Materials and Devices 杨全岭｜武汉理工大学
15:00-15:10	Construction of Biomass-Derived Hydrogels toward Intelligent Analgesic Application 林文静｜广东工业大学
15:10-15:20	Hierarchical Nanocellulose@MOF Composites: Integrated Design for Adsorption, Sensing, and Energy Storage 吴伟兵｜南京林业大学
15:20-15:28	Construction of cellulose-based thermoplastic and biodegradable plastics by dynamic covalent modification strategy 苏治平｜四川农业大学
15:28-15:36	Auxetic Metastructure-Enhanced Flexible Triboelectric Sensors 岳欧阳｜陕西科技大学
15:36-15:44	Biochar-Derived Carbon Nitride as Photocatalysts 李春雪｜福建理工大学
15:44-15:59	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人：杨全岭（武汉理工大学）、钟林新（华南理工大学）	
15:59-16:03	Host Opening & Introduction
16:03-16:18	Lignin- and Cellulose Ester-Wax Blends — from barrier coatings to water harvesting paper materials Markus Biesalski | Technical University of Darmstadt
16:18-16:28	Unlocking Nanocelluloses from Plant Fibers for Advanced Applications 杨　轩 | 浙江大学
16:28-16:38	Microfluidic Programming for High-Performance Cellulose Fibers 叶冬冬 | 安徽农业大学
16:38-16:48	Functional and sustainable cellulose xerogels for PFAS remediation 王　蕾 | 西湖大学
16:48-16:58	Design and application of advanced cellulosic triboelectric materials in monitoring the freshness of food 杜　健 | 大连工业大学
16:58-17:08	Green Preparation of Nanocellulose and Its Applications in Paper-Based Materials 高文花 | 华南理工大学
17:08-17:16	A Nature-Inspired Separator with Water-Confined and Kinetics-Boosted Effects for Sustainable and High-Utilization Zn Metal Batteries 何会兵 | 广西大学
17:16-17:24	Anti-swelling, recyclable and wet-adhesive ionic conductive elastomers reinforced by modified cellulose for underwater wearable sensing 罗　通 | 浙江理工大学
17:24-17:32	Structurally designed cellulose-based energy storage devices 贾　浩 | 江南大学
17:32-17:40	Design and Application of Leather Collagen-Based Energy Conversion Devices 官小玉 | 陕西科技大学
18:00-20:00	Dinner

Topic 3. Cellulose-Based Functional Materials and Devices (Woya Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人：杨轩（浙江大学）、叶春洪（上海科技大学）

08:30-08:35	Host Opening & Introduction
08:35-08:50	Fabrication of Advanced Functional Fibrous Materials and Their Applications in Multiphase Separation 赖跃坤｜福州大学
08:50-09:05	Functional Modification of Biomass Materials and Their Application in the Remediation of Environmental Pollutants 陈凤娟｜兰州大学
09:05-09:15	Cellulose-based Smart Fibers and Smart Textiles 李召岭｜东华大学
09:15-09:25	Research on Structure and Performance Regulation of Biomass-Based Hydrogels 杨　龙｜西南林业大学
09:25-09:35	Molecular Design and Functional Applications of Cellulose 赵大伟｜沈阳化工大学
09:35-09:43	Lignocellulosic material derived self-powered sensors and advanced applications 王宝斌｜齐鲁工业大学（山东省科学院）
09:43-09:51	Polysaccharide Nanofiber Assembly for High-performance Sodium Metal Batteries 卓　浩｜华南理工大学
09:51-09:59	The Structural Regulation and Application of Cellulose Aerogels by Freeze Casting 孙佳明｜广西大学
09:59-10:14	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人：李召岭（东华大学）、杨龙（西南林业大学）	
10:14-10:18	Host Opening & Introduction
10:18-10:28	Nanocellulose-based Circularly Polarized Organic Phosphorescence Materials 叶春洪｜上海科技大学
10:28-10:38	Dynamic covalent bond exchange regulates hydrogen-bond network uniformity in tough transparent bamboo paper 方志强｜华南理工大学
10:38-10:48	Cellulose-based materials and derivatives for sustainable rechargeable energy storage devices 张学铭｜浙江理工大学
10:48-10:58	Structural creation and efficient catalytic conversion application of biomass-based single-atom catalysts 李　延｜武汉大学
10:58-11:06	Structural and Interfacial Regulation of Biomass Materials for Energy Harvesting and Self-Powered Sensing 高　莹｜兰州大学
11:06-11:14	Structural Engineering, Flexibilization, and Applications of Cellulose-Based Aerogels 陈泽虹｜华南农业大学
11:14-11:22	pH-Responsive Cellulose-Reinforced Biomass-Derived Colorimetric Labels for Intelligent Food Freshness Monitoring 石佳博｜陕西科技大学
11:22-11:30	Regulatory Construction Mechanism of Strong and Tough Hydrogels: From Molecular to Microscopic Scales 付浩成 | 南京林业大学
11:30-11:38	Selective Surface Graphitization of Cellulose Aerogel via Low-Temperature Non-Aqueous Phase Interface Engineering 秦　影｜长沙理工大学
12:00-14:00	Buffet Lunch

Topic 4. Biomass Refining and Chemicals (VIP1 Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：李雪辉（华南理工大学）、郭家奇（南京林业大学）

14:00-14:05	Host Opening & Introduction
14:05-14:20	Development of Functional Materials from Lignocellulosic Biomass 司传领丨天津科技大学
14:20-14:35	New Strategies for Biomass Refining: Selective Protection of Multiple Hydroxyl Groups in Biomass Components Mediated by Aldehydes 帅　李丨福建农林大学
14:35-14:45	Regulation of Chiral Nematic Structures in Cellulose Derivatives and Construction of Functional Materials 郭家奇丨南京林业大学
14:45-14:55	Development of Lignin-Based Low-Carbon Bio-Based Resins and Sustainable Materials 文甲龙丨北京林业大学
14:55-15:05	Valorization of Lignin into Aviation Fuel Precursors 秦延林丨广东工业大学
15:05-15:15	Towards Cost-Efficient Catalytic Production of Bio-Based Polyester Monomer FDCA 彭林才丨昆明理工大学
15:15-15:25	Single-atom Catalysts for Ethanol Dehydrogenation 庞纪峰丨中国科学院大连化学物理研究所
15:25-15:35	Green Preparation and Functional Applications of Bamboo Dissolving Pulp Based on Deep Eutectic Solvents 段　超丨陕西科技大学
15:35-15:43	Green Solvent-induced Fractionation, Fibrillation and Utilization of Bamboo Cellulose 凌　喆丨南京林业大学
15:43-15:51	Structural Design and Applications of Wood Fiber-Based Heavy Metal Adsorption Materials 毛　珺丨广西大学
15:51-16:06	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人：司传领（天津科技大学）、段超（陕西科技大学）	
16:06-16:10	Host Opening & Introduction
16:10-16:25	Catalytic Conversion of Biomass with High Efficiency 李雪辉｜华南理工大学
16:25-16:40	Amine-Based Pretreatment and Catalytic Conversion of Lignocellulose into N-heterocyclic compounds 楼宏铭 ｜华南理工大学
16:40-16:50	Biomass-Derived Hard Carbon Anodes for Sodium-Ion Batteries 张文礼｜广东工业大学
16:50-17:00	Directed Catalytic Transformation of Biomass Components 陈祖鹏｜南京林业大学
17:00-17:10	Development of Functional Materials through Aggregation and Polymerization Strategies for Industrial Lignin 戴　林｜天津科技大学
17:10-17:20	Towards a Waste-free Biorefining: Bringing Energy-Environmental Functions into Multifaceted Lignocellulose Valorization 徐继坤｜武汉科技大学
17:20-17:30	Functional Applications of Dynamic Disulfide Bonds in Biomass-based Polymer Composites 夏南南｜齐鲁工业大学（山东省科学院）
17:30-17:38	High-Value Conversion of Biomass Waste Using Green Solvents 杨　爽｜西安交通大学
17:38-17:46	Directional Thermal Conversion of Technical Lignin into High-heat-sink Jet Fuels via Coupling Enhancement of Reaction and Mass Transfer 刘　超｜东南大学
18:00-20:00	Dinner

Topic 4. Biomass Refining and Chemicals (VIP1 Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人：曾宪海（厦门大学）、马纪亮（大连工业大学）

08:30-08:35	Host Opening & Introduction
08:35-08:45	Design and Construction of Lignocellulose-Derived Carbon Functional Platforms for Electrochemical Energy Storage and Hydrogen Evolution 闵斗勇｜广西大学
08:45-08:55	Mechanistic Investigation of the Whole-Component Dissociation of Eucommia ulmoides Gum-Containing Organs 朱铭强｜西北农林科技大学
08:55-09:05	Structural Design of Cellulose-Based Electromagnetic Shielding Materials 戴　磊｜江南大学
09:05-09:15	Regulation of Catalyst Surface and Interfacial Properties for the Hydrogenolytic Ring Opening of Biomass-Derived Furan Compounds 赵泽伦｜苏州科技大学
09:15-09:25	Design and Construction of Biomass Based Functional Materials and Their Application in the Field of New Energy 熊传银｜陕西科技大学
09:25-09:35	Converting Agricultural and Forestry Wastes and CO_2 into High-Value Bioproducts for a Carbon-Neutral Future 崔绍庆｜浙江大学
09:35-09:43	Pretreatment-dependent Lignocellulose Valorisation: from Tailored Fractionation to Specific Applications 史昌蓉｜昆明理工大学
09:43-09:51	Photocatalytic Synthesis of High-value Chemicals from Biomass-Derived Sugar 李明富｜广东省科学院
09:51-10:06	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人：朱铭强（西北农林科技大学）、闵斗勇（广西大学）	
10:06-10:10	Host Opening & Introduction
10:10-10:20	Design and Construction of Catalytic Materials for Photocatalytic Biomass Refining 马纪亮｜大连工业大学
10:20-10:30	Biomass Pulping Pretreatment and Refining for the Production of Chemicals 曾宪海｜厦门大学
10:30-10:40	Luminescent Materials from Woody Biomass 蔡旭敏｜南京林业大学
10:40-10:50	Resolving the Activity–Selectivity Paradox in HMF Photo-Oxidation via Defect-Quantity Engineering 张俊华｜昆明理工大学
10:50-11:00	Green Refining of Edible and Medicinal Biomass and Conversion of Bioactive Compounds: From Fundamental Research to Industrial Applications 张蓝月｜广东工业大学
11:00-11:08	Brewing Waste: High-value Utilization of Distillers' Grains 冯子昊｜四川轻化工大学
11:08-11:16	Fiber/Hydrogel Composites with Hierarchical Architectures for Decoupled Ion and Water Transport 杨　洋｜陕西科技大学
11:16-11:24	Structure and molar-mass analysis of various cellulose pulps by SEC/MALLS/RI system 侯高远｜马克斯·普朗克胶体与界面研究所
11:24-11:32	Conversion of Wood Cellulose into Carboxy Group-Rich Cellulose Fibers and Nanofibrils by Aqueous TEMPO/NaDCC Oxidation 侯润清｜东京大学
12:00-14:00	Buffet Lunch

Topic 5. Biological Material Catalytic Transformation (VIP2 Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：纪娜（天津大学 / 海南大学）、林绪亮（广东工业大学）

14:00-14:05	Host Opening & Introduction
14:05-14:20	Food Biomanufacturing: From Lab to Industry 刘　龙｜江南大学
14:20-14:35	Conversion of Lignocellulosic Biomass into High-Performance Aviation Fuel 邹吉军｜天津大学
14:35-14:45	Design and Preparation of High-efficiency catalysts for Catalytic Removal of Soot and NO_X 于学华｜沈阳师范大学
14:45-14:55	Efficient Cu-Based Catalysts for Selective Hydrogenolysis of Lignin 肖领平｜大连工业大学
14:55-15:05	AI-Driven Enzyme Design for High-Value Conversion of Waste Biomass 夏小乐｜天津科技大学 / 江南大学
15:05-15:15	Biomass Catalytic Conversion for The Production of Sustainable Aviation Fuel 陈伦刚｜东南大学
15:15-15:25	Effective Conversion of Cellulose into 5-Hydroxymethylfurfural via Acidic $ZnCl_2/ZnBr_2$ Molten Salt Hydrates 欧阳新平｜华南理工大学
15:25-15:33	Spinel Catalyst Regulation for Efficient Lignin Conversion into Aromatic Chemicals 漆　毅｜广东工业大学
15:33-15:41	Crystal Facet Effects in the Catalytic Conversion of Biomass-Derived Furan Compounds 周英东｜成都理工大学
15:41-15:49	Catalytic Conversion of Lignin to Aromatic Chemicals in Emulsion Systems 刘思洁｜湖南师范大学
15:49-16:04	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人：刘龙（江南大学）、肖领平（大连工业大学）	
16:04-16:07	Host Opening & Introduction
16:07-16:22	Selective Reductive Amination of Biomass and Plastics to Diamines 纪　娜｜天津大学 / 海南大学
16:22-16:32	Lignin-Derived Carbon-Based Catalytic Materials 林绪亮｜广东工业大学
16:32-16:42	Green Valorization of Lignin Toward Aromatic Chemicals Production 窦　烁｜东北林业大学
16:42-16:52	Organic Chemistry for Selective Biomass Transformations 李　洋｜西安交通大学
16:52-17:02	Functional Fiber Membranes for Sodium-Ion Batteries 钟林新｜华南理工大学
17:02-17:12	Breaking the Concentration Barrier During Catalytic Biomass Conversions 祝良芳｜四川大学
17:12-17:22	Conversion of Biomass and Waste Plastics for the Production of Fuels and Chemicals Using Beta Zeolite Catalyst 孔令照｜苏州科技大学
17:22-17:32	Selective C–C and C–O Bond Cleavage of Biomass-Derived Sugars and Sugar Alcohols toward Value-Added Monomers 孙睿岩｜南京工业大学
17:32-17:42	Construction of POMs-ETM Catalysts and Investigation on Catalytic Oxidation Activity 王晓红｜东北师范大学
17:42-17:52	Selective Dissolution and Catalytic Conversion of Lignin Components in Biomass 余　强｜华南农业大学
17:52-18:00	Application Research on Glucose Electrooxidation Coupled with Nitrate Electroreduction to Ammonia 吴籼虹｜大连工业大学
18:00-20:00	Dinner

Topic 5. Biological Material Catalytic Transformation (VIP2 Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人：李昌志（广西国控集团 / 西北大学）、杨维冉（南昌大学）

08:30-08:35	Host Opening & Introduction
08:35-08:50	From Biomass Deconstruction to Precision Chemical Synthesis: Multiscale Catalytic Design for Renewable Chemicals 胡劲光｜卡尔加里大学
08:50-09:00	Reconstructing Lignocellulosic Biomass for Value-Added Applications 陈朝吉｜武汉大学
09:00-09:10	Aqueous-Phase Catalytic Coupling of Low-Carbon Alcohols for the Synthesis of Higher Alcohols 仇松柏｜广东工业大学
09:10-09:20	Metal/Oxide Heterostructures Enable H_2 Relay Activation for Efficient HMF Hydrogenation in Water 唐　兴｜厦门大学
09:20-09:30	Catalytic Alcohols Production from Biomass Derived Furan Platforms Hydrogenolysis by Selective Ring Opening 刘琪英｜南京林业大学
09:30-09:38	Electrifying Palladium Catalysis in Water: Steady-State Pd(0) Regulation Enables Sustainable Heck and Suzuki–Miyaura Cross-Couplings 张海川｜杭州师范大学
09:38-09:46	Lignin Depolymerization over Metal-Based Catalysts: From Hydrogenolysis to Oxidation 郭海威｜河北工业大学
09:46-09:54	Steering Selective C–C Bond Scission in Biomass Photorefinery via Oxygen Vacancy–Heterojunction Synergy 吕天平｜昆明理工大学
09:54-10:09	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人：胡劲光（卡尔加里大学）	
10:09-10:13	Host Opening & Introduction
10:13-10:28	Catalytic Synthesis of Bio-Based Aromatic Polyester Building Blocks 李昌志｜广西国控集团 / 西北大学
10:28-10:38	Selective Conversion of Triglycerides into Long-Chain Alcohols by Catalytic Interface Regulation 杨维冉｜南昌大学
10:38-10:48	Key Technology of Chemo-Enzymatically Transforming the Lignocellulosic Biomass into Mixed Fermentable Sugars 孙付保｜江南大学
10:48-10:58	Sustainable Polymers from Renewable Aldehydes via Sulfur Chemistry 袁　亮｜安徽农业大学
10:58-11:08	Efficient Catalytic Conversion of Cellulosic Biomass and Its Platform Compounds 张燕娟｜广西大学
11:08-11:18	From Enzyme Molecular Modification to Industrial Adaptation: Technical Pathways and Trends in Green Applications of Papermaking Enzymes 王成华｜广西大学
11:18-11:28	Semi-Hydrogenation and Interfacial Engineering for Selective Ring-Opening Hydrogenolysis of Biomass-Derived Furanics to Diols and Polyols 刘　勇｜南昌大学
11:28-11:38	Localized Strong-Adsorption Enzyme-Like Solid Acids Catalysis for Cellulose to Sugar 冯成启｜中国科学院宁波材料技术与工程研究所
11:38-11:46	Efficient Dehydrogenation of Ethanol over Cu-Based Catalysts 孟庆伟｜广东工业大学
11:46-11:54	AI-Enabled Straw Biorefinery: From Non-Food Sugars to Industrial-Grade Bio-Based Products 李　承｜聚维元创（连云港）生物科技有限公司
12:00-14:00	Buffet Lunch

Topic 6. Sustainable Packaging Materials (Jinyumantang Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1 | 主持人：王小英（华南理工大学）、宦思琪（东北林业大学）

14:00-14:05	Host Opening & Introduction
14:05-14:20	Smart labels and innovative food preservation packaging 曾新安 | 佛山大学
14:20-14:30	Preparation of Flexible Printed Electronic Devices via All-Printing Methods and Their Application in Smart Packaging 吴　伟丨武汉大学
14:30-14:40	Construction of Biomass-based Sustainable Packaging Substrates and Their Regulation Strategies in the Dual-functions of Food Freshness Indication and Antibacterial Activity 黄晓玮丨江苏大学
14:40-14:50	Paper-based bimodal light modulation devices and their applications in smart packaging 刘国栋丨陕西科技大学
14:50-15:00	Non-equilibrium interfacial assembly of nanochitin 卢　翊丨中国科学院过程工程研究所
15:00-15:10	Developing electrospinning films for postharvest quality control of fruits 岳　进丨上海交通大学
15:10-15:18	Fabrication and Application of Lignin-based Functional Flexible Gel Materials 王汉敏丨天津科技大学
15:18-15:26	Preparation and Properties of Biomass-Based Non-Isocyanate Polyurethane 雷婉青丨西安理工大学
15:26-15:34	Curcumin-based antimicrobial waterborne polyurethane/gelatin composite film for pork preservation 钟雨晔丨湖南工业大学
15:34-15:42	Structural Design of Carbonene-Based Composites for Electromagnetic Interference Shielding 郭权芬丨西安理工大学
15:42-15:57	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人：黄晓玮（江苏大学）、吴伟（武汉大学）	
15:57-16:02	Host Opening & Introduction
16:02-16:17	Green Fabrication of Polysaccharide-based Antibacterial Materials and Its Application in Food Preservation 王小英丨华南理工大学
16:17-16:27	Interface-Engineered Reconfiguration and Assembly of Biomass-Derived Functional Materials 宦思琪丨东北林业大学
16:27-16:37	Microfiber Intelligence: Nanofiber-Based Active Packaging for Rapid Quality Indication of Chilled Meat 孙文秀丨内蒙古农业大学
16:37-16:47	Development of sustainable food packaging film incorporated with natural plant extracts 陈大文丨马来西亚博特拉大学
16:47-16:57	Exploration of High-Value Utilization of Lignin 徐靖宇丨齐齐哈尔大学
16:57-17:05	Cationic Organosilicon Terpolymer-Modified Fibers for High-Barrier Sustainable Packaging via Synergistic Anchoring and Cross-Linking 刘祝兰丨南京林业大学
17:05-17:13	Degradation Mechanism and Preventive Measures of Alum-Gelatin Sized Painting and Calligraphy Paper 何　贝丨陕西师范大学
17:13-17:21	Bioinspired Design and Interface Engineering of Biomass-Based Adhesive Materials 魏　渊丨东莞理工学院
17:21-17:29	Multiscale Interfacial Regulation and Active-Component Stabilization for Multifunctional Antibacterial Paper-Based Packaging Materials 唐淑玮丨中国海洋大学
17:29-17:37	Functional Design of Sustainable Biomass-Based Packaging Materials: Photoresponsive Antibacterial Activity and pH-Responsive Functions 李　凡丨西安理工大学
17:37-17:45	High-value utilization of lignin from papermaking black liquor and its application in regeneration of aged asphalt 于瑞恩丨中北大学
18:00-20:00	Dinner

Topic 6. Sustainable Packaging Materials (Jinyumantang Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人：周星（西安理工大学）、余静芳（中国地质大学（武汉））

08:30-08:35	Host Opening & Introduction
08:35-08:50	Design and Applications of Paper-Based Packaging Coatings Based on Functionalized SiO_2 Microspheres 鲍　艳	陕西科技大学
08:50-09:00	From Waste Cotton to Sustainable Packaging Aerogels: Multiscale Construction and Multifunctionalization of Regenerated Cellulose Fibers 陈凤翔	武汉纺织大学
09:00-09:10	Printable electronic materials and technologies for flexible integrated devices 刘旭影	郑州大学
09:10-09:20	Exfoliation and ordered assembly of single-layer chitin molecular sheet for Multifunctional Chitinous Materials 尤　俊	湖北大学
09:20-09:30	Lignin extraction and functionalization in the lignocellulose pretreatment process and its application 吉海瑞	齐鲁工业大学（山东省科学院）
09:30-09:40	Multifunctional Cellulose Films for Sustainable Packaging 程芳超	广西大学
09:40-09:48	Construction of Bio-Based Micro-Nano Materials and Research on Their Latest Applications 姜炜坤	齐鲁工业大学（山东省科学院）
09:48-09:56	Design and Applications of Cellulose-Based Stimuli-Responsive Packaging 李　超	大连工业大学
09:56-10:11	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人：鲍艳（陕西科技大学）、陈凤翔（武汉纺织大学）	
10:11-10:15	Host Opening & Introduction
10:15-10:25	Upcycling Waste PET Plastics into Printing Inks for Packaging 周　星 | 西安理工大学
10:25-10:35	Production of Inorganic Nanosheets for High-Gas-Barrier Flexible Packaging Films 余静芳 | 中国地质大学（武汉）
10:35-10:45	Machine Learning-Integrated, Super-Tough Biomass-Based Double-Network Hydrogel for Automated Freshness Monitoring and Multilevel Information Encryption 徐晓文 | 暨南大学
10:45-10:55	Comparative study on polylactic acid/anthocyanin based bilayer colorimetric films fabricated by electrospinning or casting method 李亚娜 | 武汉轻工大学
10:55-11:05	Functional Materials for Smart Food Packaging: From Scalable Production to Practical Applications 李　立 | 上海海洋大学
11:05-11:13	Study on Pulsed Electrocatalytic Conversion of Biomass-Derived Small Molecules 陈　威 | 贵州民族大学
11:13-11:21	The Preparation of Hemicellulose-based Antioxidant Packaging Films and the Effects on Preservation of Edible Oils 吕艳娜 | 大连工业大学
11:21-11:29	Molecular Regulation of Lignin Microstructure and Construction of Energy Storage Carbon Materials 符方宝 | 广东工业大学
11:29-11:37	Structural Design and Performance of Polymer-Based Functional Composites 宋　萍 | 西安理工大学
11:37-11:45	Preparation and Properties of CTAB-Modified Montmorillonite/TCA/PBAT Composite Films 林新兴 | 福建技术师范学院
11:45-11:53	Construction and Performance of Efficient Biomass-Based Electromagnetic Shielding Materials 郝茜珣 | 西安理工大学
12:00-14:00	Buffet Lunch

Topic 7. Special Session for Young Scholars (Womei Hall)

November 7, 2026, Saturday Afternoon Sessions

Parallel Sessions, Session 1｜主持人：袁同琦（北京林业大学）、曾宪海（厦门大学）

13:30-13:35	Host Opening & Introduction
13:35-13:48	Construction of Biomass-Based Single-Atom Catalysts and Mechanistic Study on Their Application in the Green Synthesis of N-Alkylamines 裴响林｜贵州师范大学
13:48-14:01	Preparation and Applications of Xylan Derivatives 饶　俊｜北京林业大学
14:01-14:14	Structural Engineering and Functionalization of Self-Supporting Carbon Materials Derived from Woody Biomass 赵　鑫｜齐鲁工业大学（山东省科学院）
14:14-14:27	Multiscale Structural Regulation of Cellulosic Materials for Enhanced Mechanical and Triboelectric Properties 蔡晨晨｜广西大学
14:27-14:40	Construction and Application of Mycelium Materials Using Biomass as a Nutrient Source 张伟华｜四川大学
14:40-14:53	Colloid-Mediated Structural Functionalization of Wood-Derived Cellulose Scaffolds for Industrial Water Electrolysis 廖　宇｜中南林业科技大学
14:53-15:06	Elucidating and Regulating Intermolecular Interactions in Lignocellulosic Biomass 刘启予｜广东工业大学
15:06-15:19	Lignin Structure-Mediated Regulation of Metal Catalysts and Their Catalytic Applications 庞泰然｜天津科技大学
15:19-15:32	Application of Natural Biomass Materials in Aqueous Zinc Batteries 郑加贤｜福建农林大学
15:32-15:45	Harnessing Cellulose-Water Interactions toward Multiscale Functional Materials 朱朋辉｜南京林业大学
15:45-16:00	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 2 | 主持人： 许凤（北京林业大学）、任俊莉（华南理工大学）	
16:00-16:05	Host Opening & Introduction
16:05-16:18	Valorization of Biomass Structural Value and Multi-scale Functionalization 水　涛｜东南大学
16:18-16:31	Cellulose hydrophobic materials for energy harvesting and utilization 刘　涛｜广西大学
16:31-16:44	Structure-Guided Design of Porous Materials for Biomass Valorization 王兴杰｜华南理工大学
16:44-16:57	Biomass-based flexible functional sensor devices 郝三伟｜山东理工大学
16:57-17:10	Synergistic Co-Zn dual atomic sites drive C-lignin hydrogenolysis via vicinal C-O cleavage 王水众｜北京林业大学
17:10-17:23	Lignocellulose Based Near-Infrared Transparent Filter 冯清华｜湖北工业大学
17:23-17:36	Charge-Driven Bioinspired Cellulose Surfaces for Efficient Water Harvesting 张　松｜广西大学
17:36-17:49	Controlled Synthesis of Lignin-Metal Supramolecular Frameworks and Study of Their Derived Carbon Materials for Hydrogen Evolution in Water Splitting 刘江淋｜广东工业大学
17:49-18:02	Construction and Application Exploration of Cellulose-Covalent Organic Framework Composite Systems 朱礼玉 | 天津科技大学
18:02-20:00	Dinner

Topic 7. Special Session for Young Scholars (Womei Hall)

November 8, 2026, Sunday Morning Sessions

Parallel Sessions, Session 3 | 主持人： 帅李（福建农林大学）、陈祖鹏（南京林业大学）

08:30-08:35	Host Opening & Introduction
08:35-08:48	Collagen Matrix-Based Electroactive Biomaterials Integrated with Therapy/Diagnosis–Health Monitoring 刘新华 | 陕西科技大学
08:48-09:01	Converting biomass into carbon-based semiconductors for efficient photocatalysis 徐良胖 | 华南理工大学
09:01-09:14	Multiscale Interfacial Regulation Mechanisms of Plant Fibers and Functional Materials Development 孔维庆 | 东华大学
09:14-09:27	Molecular regulation of lignin and controlled construction of nanoparticles 姚双全 | 广西大学
09:27-09:40	Green Flexible Electronic Materials and Devices: Fabrication and Applications 刘　学 | 东北林业大学
09:40-09:53	Study on the microstructure regulation mechanism and energy storage structure-activity relationship of lignin based carbon fibers 叶海船｜浙江理工大学
09:53-10:06	Surface and Interface Functionalization of Biomass Materials through Polymer Brush Strategy 苗冬田 | 西南林业大学
10:06-10:21	Poster Presentation & Tea/Coffee Break

Parallel Sessions, Session 4 | 主持人： 李建国（福建农林大学）、林绪亮（广东工业大学）	
10:21-10:26	Host Opening & Introduction
10:26-10:39	Plant Polyphenol Assembly for Cross-Scale Materials and Adaptive Biointerfaces 何云翔 | 四川大学
10:39-10:52	Woody Biomass Materials for Coupled Water Purification and Resource Recovery 陈　露 | 武汉大学
10:52-11:05	Cellulose Dissolution and Valorization in Novel Ionic Liquids 李　鑫 | 北京林业大学
11:05-11:18	The integration of CO_2 electroreduction with wastewater denitrification 吴祺祺 | 华南理工大学
11:18-11:31	Functional Applications of High-Performance Aramid Fibers in Next-Generation Batteries 陈维婧 | 陕西科技大学
11:31-11:44	Modification of lignin structure and application of lignin-based functional materials 杜博宇 | 广西大学
12:00-14:00	Buffet Lunch

Main Session (Wosheng Hall)

November 8, 2026, Sunday Afternoon Sessions

Plenary Speeches, Session 3 | 主持人：孙润仓（大连工业大学）	
14:00-14:05	Host Opening & Introduction
14:05-14:35	酶制剂与半纤维素的高值转化 High-Value Conversion of Enzyme Preparations and Hemicellulose 江正强丨中国农业大学
14:35-15:05	纸基智能传感器及其在食品质量与安全中的应用 Paper-Based Smart Sensors and Their Applications in Food Quality and Safety 邹小波丨江苏大学
Plenary Speeches, Session 4 | 主持人： 江正强（中国农业大学）	
15:05-15:10	Host Opening & Introduction
15:10-15:40	香味协同与释放控制关键技术及应用 Key Technologies and Applications of Fragrance Synergy and Release Control 肖作兵丨上海交通大学
15:40-16:10	生物质能源与材料研发进展 Research Progress of Biomass Energy and Materials 孙润仓丨大连工业大学
16:10-16:55	Closing Ceremony
18:00-20:00	Buffet Dinner

Graduate Student Session 1 (VIP1 Hall)

November 6, 2026, Friday Afternoon Sessions

主持人：何千（广西大学）

14:00-14:08	Bamboo-node-inspired cellulose nanofiber-based conductive aerogel for motion monitoring 廖风熙丨华南理工大学
14:08-14:16	Coupled mechano-chemical pretreatment of poplar wood to enhance enzymatic hydrolysis for low-cost biorefinery 李维溶丨天津科技大学
14:16-14:24	A Bioinspired Cellulosic Elastomer with Ultrahigh Robustness Enabled by Structure-Induced Reconstruction for Impact Protection 姜舸媛 丨 沈阳化工大学
14:24-14:32	Deciphering the differential response of bamboo cell types to benzyl triethyl ammonium chloride/formic acid system for selective separation 周俊杰丨华南理工大学
14:32-14:40	Bamboo Fiber-Based Manganese Nodule Leaching Technology of the Ocean 王珉鑫丨沈阳化工大学
14:40-14:48	Establishment of sustainable system for bagasse bargaining: Combining fractionation of saccharides, recycling of high-viscosity solvent and dismantling 李意涵丨广西大学
14:48-14:56	Thermoplastic phase reconstruction of maleic anhydride-esterified lignin for high-performance all-biomass films 刘飞燕丨浙江大学
14:56-15:04	Efficient fractionation of eucalyptus biomass into high quality cellulose and lignin using a novel ternary deep eutectic solvent 周生涛丨华南理工大学
15:04-15:12	Cellulose nanofiber enabled multiscale engineering of ZnO for high-performance flexible piezoelectric devices 马俊杰丨广西大学
15:12-15:20	Synergy of Ni nanoparticles and MoOx species for selective hydrodeoxygenation of lignin into cycloalkanes 吴梓凡丨中国石油大学（华东）

15:20-15:28	Lignin-mediated polyimide/nitride composites for efficient thermal management 乔义超 | 天津科技大学
15:28-15:36	Aqueous lignin adhesive for high-performance wood bonding 周　鑫 | 华南理工大学
15:36-15:44	Lignin-Fe coordination supramolecular network enables rapid and scalable assembly of efficient solar evaporators 李　威 | 天津科技大学
15:44-15:54	Tea/Coffee Break
主持人：马纪亮（大连工业大学）	
15:54-16:02	Effects of aromatic units, linkages, and end-groups of lignin on its UV shielding properties and color 周晓晗 | 广西大学
16:02-16:10	Preparation and dye adsorption properties research of lignocellulosic aerogels based on $ZnBr_2 \cdot 4H_2O$ molten salt hydrate 赵连杰 | 北京林业大学
16:10-16:18	Acetone-assisted deep eutectic solvent extraction preserves lignin reactivity for stable high-strength waterborne epoxy adhesives 李辰旭 | 湖北工业大学
16:18-16:26	Chemical-space-guided screening of deep eutectic solvents for β-O-4 bond cleavage in lignin 单雨乐 | 湖北工业大学
16:26-16:34	Fabrication and performance investigations of smart cellulose-based hydrogel dressings 陆　勤 | 广西大学
16:34-16:42	Sustainable lignin-based non-isocyanate polyurethanes with photothermal responsiveness and reprogrammable shape memory 李长庚 | 大连工业大学
16:42-16:50	Multiscale engineering of cellulose-based covalent organic framework composite aerogels for atmospheric water harvesting 杨红彬 | 天津科技大学
16:50-16:58	Vascular bundle-inspired interface-differentiated starch-based hydrogels with high toughness, high conductivity, and low hysteresis 李婉赫 | 广西大学

16:58-17:06	Fabrication and property investigation of thermo-moldable high-strength cellulose-based bioplastics 赵崇滔丨广西大学
17:06-17:14	Fabrication of high-performance cellulose nanocomposites via in-situ polymerization 张晨曦丨浙江大学
17:14-17:22	Nanoengineered all-cellulose bilayer barrier papers for high-performance and recyclable food packaging 吴柔芬丨浙江大学
17:22-17:30	Research on the multiscale coupling construction and photothermal conversion performance of wood-based nanocellulose/COF composite membranes 黎晓敏丨天津科技大学
17:30-17:38	Synergistic construction of high-strength and high-conductivity cellulose eutectogels via DES-induced chain aggregation and in-situ polymerized PEDOT 黄焕成丨广西大学
17:38-17:46	Nanocellulose-stabilized Pickering emulsions：preparation, characterization, and pesticide encapsulation efficacy 樊　荣丨齐鲁工业大学（山东省科学院）
17:46-17:54	Biocatalytic Nano-conversion of Lignocellulose and Its Applications 任旭东丨天津科技大学
18:00-20:00	Buffet Dinner

Graduate Student Session 2 (VIP2 Hall)

November 6, 2026, Friday Afternoon Sessions

主持人：曾林涛（广西大学）

14:00-14:08	Electrocatalytic synthesis of branched-alkane aviation fuels from bio-based short-chain fatty acids 杨欣煜丨四川大学
14:08-14:16	Chain-extension upgrading of biomass-derived volatile fatty acids toward high-energy-density sustainable aviation fuel 张炳原丨四川大学
14:16-14:24	Customizing K/C dual sites to orient Lewis acid/oxygen species for photo-upgrading of biomass sugars into lactic acid 罗启志丨贵州大学
14:24-14:32	Interfacial thermoconvection and atomic relay catalysis enable equilibrium shifting and rapid glucose-to-fructose isomerization 郭陆林丨贵州大学
14:32-14:40	Multi-level structure regulation of glucose electrooxidation carbon based Ni catalysts and fuel cell performance 彭　坚丨广西大学
14:40-14:48	Regulating the cathode–electrolyte interphase and low-temperature cycling of 4.7 V NCM811 batteries with LiDFP/TMSB co-additives 何程程丨广西大学
14:48-14:56	Design of Al_2O_3-supported Pd-based single-atom catalysts for selective hydrogenation of cinnamaldehyde 卢廷杰丨广西大学
14:56-15:04	Biomimetic dynamic Li^+ coordination within lithiated cellulose nanocrystal networks enables selective ion transport for high-rate lithium-ion batteries 张　栋丨陕西科技大学
15:04-15:12	Engineering supramolecular interactions in bio-based polyamides via bifuran moiety design 张晏馨丨南京工业大学
15:12-15:20	Design and application research of photothermal/photodynamic chlorophyll molecules 王宝帅丨齐鲁工业大学（山东省科学院）

15:20-15:28	Readily available highly active heterogeneous zinc catalyst on 2D COFs for confined ring-opening polymerization of cyclic esters 黄立强丨广西大学
15:28-15:36	Cellulose-based piezoelectric/moisture-electric devices: From material structural design to performance enhancement 唐　雪丨广西大学
15:36-15:44	Janus asymmetric-wettability cellulosic triboelectric materials 梁容榕丨广西大学
15:44-15:54	Tea/Coffee Break
主持人：史歌（广西大学）	
15:54-16:02	Bioinspired superhydrophobic and conductive Janus asymmetric triboelectric materials for intelligent tactile perception 邹雪莲丨广西大学
16:02-16:10	Bioinspired heterogeneous wettability triboelectric sensors for sweat collection and monitoring 李雪迪丨广西大学
16:10-16:18	Kinetically regulated structural reconstruction of confined COFs in cellulose aerogel for high-performance solar steam generation 汤银娇丨天津科技大学
16:18-16:26	Dual carbon-mediated interfacial charge engineering of $ZnIn_2S_4$ for efficient H_2O_2 photosynthesis and microplastic degradation 刘　洋丨湖北工业大学
16:26-16:34	Piezoelectric devices for machine learning-assisted sensing and micro-energy harvesting 邹礼超丨广西大学
16:34-16:42	Molecular and interfacial engineering of cellulosic materials for enhanced electrical performance in self-powered flexible electronics 张品乐丨广西大学
16:42-16:50	A ratiometric fluorescent platform based on xylan-derived carbon dots for detecting Vibrio parahaemolyticus 吴圣烨丨华南理工大学

16:50-16:58	FRET-driven red phosphorescence in lignin carbon dots for stimuli-responsive encryption 徐鑫圆丨青岛科技大学
16:58-17:06	O/C ratio-driven fluorescence enhancement in cellulose-derived carbon quantum dots 师亚荣丨广西大学
17:06-17:14	Occurrence and risk of microplastics in papermaking wastewater 江柯漾丨广西大学
17:14-17:22	Nitrogen removal performance of a zeolite-composite hydrogel carrier for low-ammonium wastewater treatment 谢　立丨广西大学
17:22-17:30	Revealing pseudo-selectivity of phosphate in reducing calcium precipitation during anaerobic digestion: Precipitation location, endogenous alkalinity or reaction kinetics 连　华丨广西大学
17:30-17:38	Fluorescence and colorimetric organogel sensor for gas phase detection of biogenic amines and its enrichment mechanism 王贵鑫丨南京林业大学
17:38-17:46	AI-Driven Biomass Refining and Lignocellulosic Material Characterization Platform 赵佳鑫丨华南理工大学
17:46-17:54	Hydration-State Regulation Enables High-Performance Hydrogel-Based Moisture-Electric Generation 撒君茹丨 广西大学
18:00-20:00	Buffet Dinner

Poster Presentation

- The ID numbers are the manuscript numbers we have been contacting with you. They are also the poster numbers you should find at the poster sites when you come to the symposium.

- Posters to be displayed on November 7–8 must be mounted by 22:00 on November 6.

No	ID	Title	Author Name
1	001	Analysis of Drying Characteristics and Structural Optimization of a Yankee Hood Ventilation System Based on CFD	Chenyu Jiang
2	002	Modeling and Energy-Saving Potential Analysis of Turbo Vacuum Pump Exhaust Heat Recovery for Paper Machine Dryer Hood	Xuehui Fang
3	003	Effects and Mechanism of Choline Chloride/Oxalic Acid Deep Eutectic Solvent Treatment on the Properties of Recycled Fibers from Eucalyptus Chemical Pulp	Li Wang
4	004	Effects of Bamboo Multiscale Heterogeneous Structure on Mass Transfer during Alkaline Pulping	Xin Wang
5	005	Preparation and Properties of Tea Stem sulfonate Adhesive	Zhenzeng Wu
6	006	Preparation of Decolorized Lignin via Bleaching and Flash NanoPrecipitation for Sunscreen Applications	Caixiu Li
7	007	A new reusable wood adhesive modified by disulfide bond based on polyurethane	Chen Lin
8	008	Biomimetic M_xO_y-Mediated Interfacial Polarization of N–H/C–H Bonds in Polyurethane Foam for Enhanced Nanoplastics Capture	Jindie Xiao
9	009	Research Progress on Alkali Lignin-Modified Waterborne Polyurethane	Jirui Liu
10	010	Injectable Self-Healing Biomass-Based Hydrogel Bioadhesive Integrating Skin Bioelectronics and Regenerative Wound Healing	Jiajia Tang
11	011	Ultra-strong bamboo macrofibers via selective delignification and microwave drying for lightweight structural composites	Qinglu Sun

No	ID	Title	Author Name
12	012	Research on the Mechanism of Coupling Lignin Carbon-Based Metal Catalysts with Biomass Oxidation for Efficient Hydrogen Production	Jianglin Liu
13	013	Single-Atom Engineering of Cellulose Dielectrics Enables Molecular-Scale Interfacial Polarization for Dielectric Energy Storage and Self-Powered Sensing	Neng Xiong
14	014	A Cellulose-Based Near-Infrared Fluorescent Probe for Rapid Hypochlorous Acid Detection, Ferroptosis Monitoring, and In Vivo Imaging	Yanyu Chen
15	015	Competitive coordination modulation and cellulose nanofibril reinforced eutectogels for stable low-temperature self-healing strain sensing	He Feng
16	016	Tannic Acid-Complexed Cellulose Nanofiber Enabled Dynamically Crosslinked Conductive Hydrogel for Reliable Strain Sensing in Extreme Cold Environments	Quanliang Wang
17	017	Tb-H_2AIP/TOCNF-PVA Composite Hydrogel: Preparation, Multifunctional Properties and Fluorescent Sensing for Ofloxacin in Aqueous Solution	Pengtao Liu
18	018	Dynamic Fe^{3+} Coordination Network-Enabled CMC-Na/PAA Conductive Self-Healing Hydrogels for Flexible Strain Sensing Applications	Jiayu Liu
19	019	Nanocellulose-Supported Dual-Lanthanide MOFs for On-Site Fluorescent Antibiotic Screening	Chao Liu
20	020	Preparation, characterization, and antioxidant properties study of proanthocyanidin-enhanced dialdehyde cellulose-gelatin nanocomposite films	Yanru Cui
21	021	High electrochemical window CNF based gel electrolyte with synergistic DES and ionic liquid treatment for supercapacitors	Han Liu
22	022	Acid-Engineered Bamboo Biochar Enables Ultrahigh Laccase Loading Yield and Superior Water Pollutant Degradation	Na Li
23	023	High Temperature Coefficient of Resistance and Toughness CNF based Ionic Hydrogels Prepared with a Facile Method for Dual-Modal Sensing	Xiaolan Song
24	024	Electron-Buffered Multimetallic Sulfides for Paired Electrocatalytic C–C Bond Cleavage in Lignin	Ji Li

No	ID	Title	Author Name
25	025	Phosphorus-Doped Bagasse-Derived Biochar: Catalytic Performance and Reaction Mechanism Insight	Xinmin Yin
26	026	Mechanistic Study of Electrocatalytic C-C Bond Cleavage and Product Regulation of Bibenzyl in the TBAPF$_6$/Methanol System	Fanyi Deng
27	027	Kinetic Parameter Prediction and Activity Characterization for Laccase Screening	Zhenyu Zha
28	028	A Modular Multienzyme Cascade for the Directional Bioconversion of D-Xylose into D-Allulose: Pathway Validation and Remaining Challenges	Xuan Yang
29	029	Hydrodeoxygenation of Low-Molecular-Weight Kraft Lignin for Jet Fuel Production	Jiangxin Li
30	030	pH-Responsive Anthocyanin/Collagen Hydrogels for Visual Meat Freshness Monitoring	Zhenhua Tian
31	031	Biobased Flame-Retardant Epoxy Adhesive Based on Resveratrol: Phosphorus–Nitrogen Synergistic Flame Retardancy and Property Investigation	Peixin Niu
32	032	Multiscale Reinforcement of Aramid-Based Composite Insulating Paper through Molecular Chain–Nanofiber Synergy	Hui Zhang
33	033	Pyruvic Acid-Synergized Choline Chloride/Oxalic Acid DES for Lignin Extraction with Suppressed Condensation	Zeyan Chen
34	034	pH-responsive antioxidant biopolymer-based dual-network hydrogel labels for deep learning-assisted real-time monitoring of shrimp freshness	Jiabo Shi
35	035	Development of an active multilayer cellulose foam packaging for moisture control and protection	KITSO MACUCWA
36	036	Bio-Inspired Fibrillar-Interlocked Interphases for Eliminating Z-Axis Mechanical Vulnerability in 3D/4D Printed PLA Composites	Zihan Zhang
37	037	Structure-function-guided Valorization of Wheat Straw Cellulose toward Multifunctional Nanocellulose Film	Zijing He
38	038	Lignin Molecular Modification Enhancing Its Bioaccessibility and Biotransformation	Ziyi Zhao
39	039	Rice Husk Cellulose-Based Reprocessable Vitrimers via Dynamic Transesterification	Yu Huang

No	ID	Title	Author Name
40	040	Separation and Direct Hydrodeoxygenation of Black Liquor Lignin into Sustainable Aviation Fuel-Range Cyclic Hydrocarbons	Longyu Zhang
41	041	Effects of Microbial Consortia on the Degradation and Humification of Poultry Manure–Straw Mixtures	Heng Jiang
42	042	High-strength thermo-moldable cellulose-based bioplastics for sustainable 3D structured materials	Chongtao Zhao
43	043	Direct hydrodeoxygenation of lignin to aviation fuel-range cycloalkanes over sulfur-vacancy engineered NiMoS catalysts	Yuting Qiu
44	044	A Study on Carbon-Carbon Cross-Linked Phosphorus-Modified Lignin as a Flame Retardant for Thermoplastic Polyurethane (TPU)	Zhiheng Chai
45	045	Photocatalytic C–C Bond Cleavage and Radical Functionalization: A Molecular Strategy Relevant to Lignin Depolymerization and Valorization	Xingwei Jiang
46	046	Synchronization of endogenous functional organic trimesic acid pretreatment for efficient hemicellulose separation and inhibition of lignin condensation	Xi Cheng
47	047	Preparation of Stable Pickering Emulsions of Nanocellulose and Research on the Encapsulation of Pesticides	Rong Fan
48	048	Bioinspired Heterogeneous Wettability Triboelectric Sensors for Sweat Collection and Monitoring	Xuedi Li
49	049	Janus Asymmetric-Wettability Cellulosic Triboelectric Materials	Rongrong Liang
50	050	Strong and Durable Triboelectric Macrofibrils Enabled by H-Bond/Ionic Coordinations	Xiangjiang Meng
51	051	Study on Sulfonated Lignin as Ligand to Activate Nickel Hydroxide for Electrocatalytic Oxidation of Biomass	Yifan Shao
52	052	Fabrication of sulfonated lignin-functionalized polyaniline-supported Cu-Co dual single-atom catalysts for efficient electroreduction of nitrate to ammonia	Xudong Ren
53	053	Hydration-State Regulation Enables High-Performance Hydrogel-Based Moisture-Electric Generation	Junru Sa
54	054	Study on Preparation and Application of Lignin-Based Multi-Crosslinking Formaldehyde-Free Adhesive	Shengyang Zhang

Notes

Traffic Guide

Address of Wosheng Hotel:

南宁沃笙酒店（江南店）南宁市江南区壮锦大道 39 号绿港国际中心（报到处在酒店一楼大厅）。

Lvgang International Center, No.39 Zhuangjin Avenue, Jiangnan District, Nanning, China.

Registration Desk is located in the lobby on the 1st floor of the hotel.

From Nanning Wuxu International Airport to the Hotel:

Distance: ~23 km, approx. 20–25 minutes by car.

Airport Shuttle Bus & Metro Line 5: Take airport shuttle bus to Nahong Overpass Station (那洪立交站), transfer to Metro Line 5, and get off at Guokai Avenue Station (Exit C) (国凯大道 C 口). Walk about 400 m to Wosheng Hotel (Jiangnan Branch).

From Nanning East Railway Station to the Hotel:

Distance: ~25 km, approx. 30–35 minutes by car.

Metro Line 1 & Line 5: Get on at Nanning East Railway Station on Line 1, change to Line 5 at Guangxi University Station (广西大学站), and get off at Guokai Avenue Station (Exit C) (国凯大道 C 口). Walk about 400 m to Wosheng Hotel (Jiangnan Branch).

From Nanning Railway Station to the Hotel:

Distance: ~13 km, approx. 20–25 minutes by car.

Metro Line 1 & Line 5: Get on at Nanning Railway Station on Line 1, change to Line 5 at Guangxi University Station (广西大学站), and get off at Guokai Avenue Station (Exit C) (国凯大道 C 口). Walk about 400 m to Wosheng Hotel (Jiangnan Branch).
